

Job title: Back End Developer

Reporting to: Team Lead / PDM

We're looking for a skilled, hardworking, motivated, deadline driven individual to help with the highly demanding backend system, this is a fantastic opportunity for someone with more experience in back end development with latest technologies. You will need skills to cover Java in an Agile TDD environment. We need a range of other skills and technologies to make our products work, so Spring, nodeJS, PM2. You'll have worked in commercial back-end software development, using tech like RabbitMQ (or other messaging frameworks) plus JavaScript, SQL, Hibernate, Spring boot, and Angular js. Here, you'll be able to showcase your skills, share your knowledge and learn from the like-minded people around you. This is a hands-on developer role, working in a small team to create products that sit at the forefront of betting and gaming. We're looking for coders who love what they do and want to make things better, faster and stronger.
